

Galleries are great places to explore - there is so much to find! Let's start by having a look around. See if you can find...

Something funny

Something scary

Something really BIG!

Something very small...

Questions to think about:

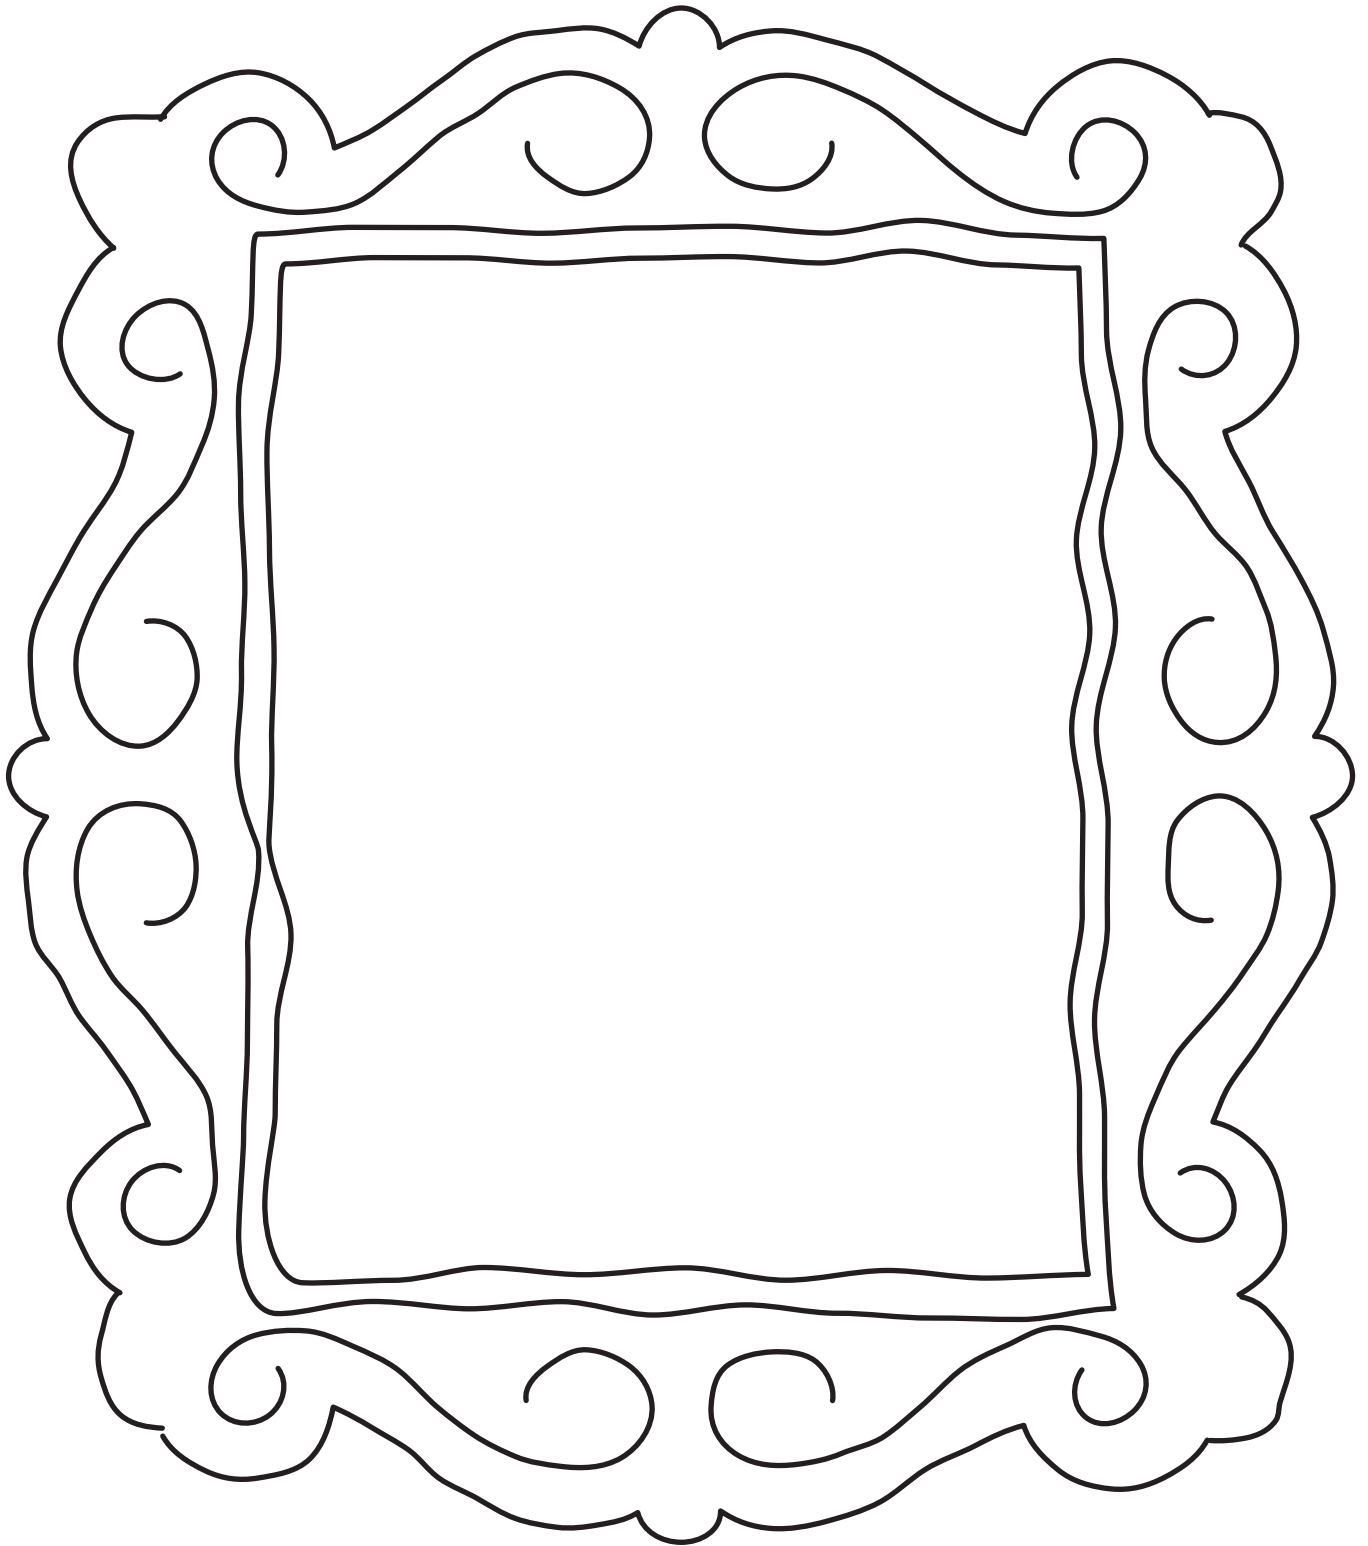

- Why is this funny?
- How does it make you feel?
- What materials can you find?
- Why did the artist choose to make it this size?
- How have the artists created different textures?

Artists love shapes and patterns! How many shapes can you see?

Draw as many shapes as you can find!

Can you find any repeated shapes or patterns? Draw your favourite patterns here!

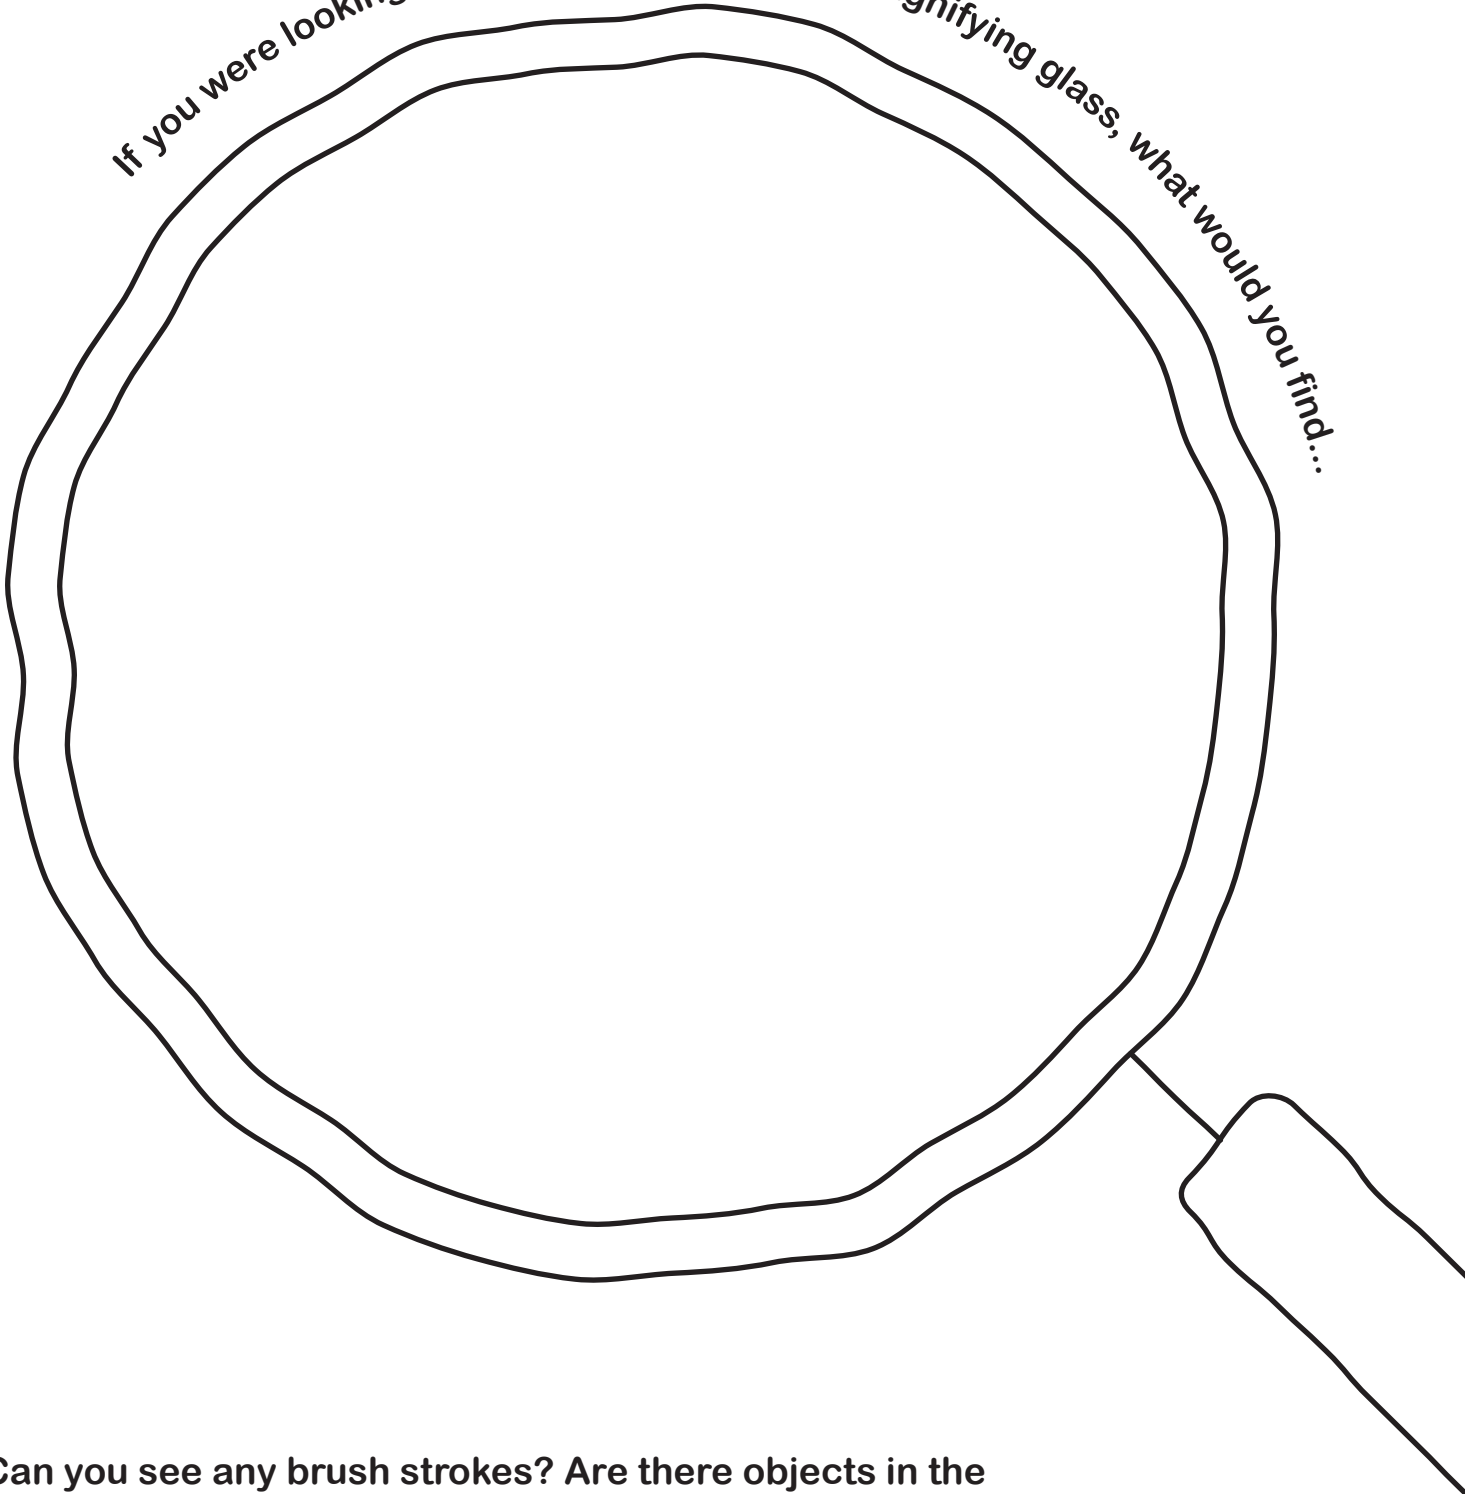

Can you make an abstract portrait using the shapes and patterns you've found?

This portrait is by...

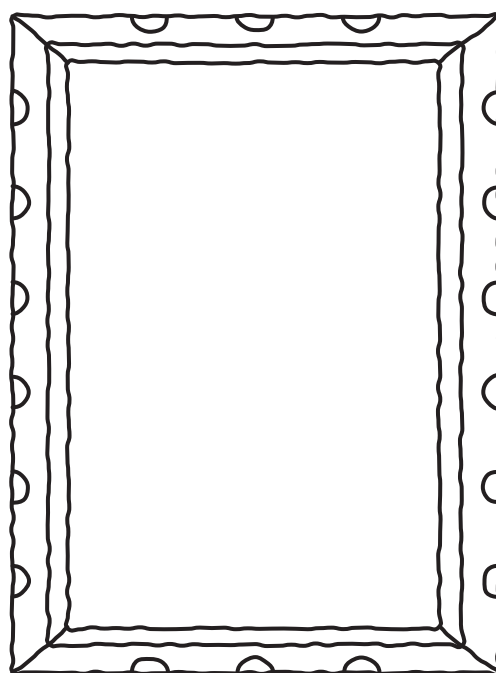

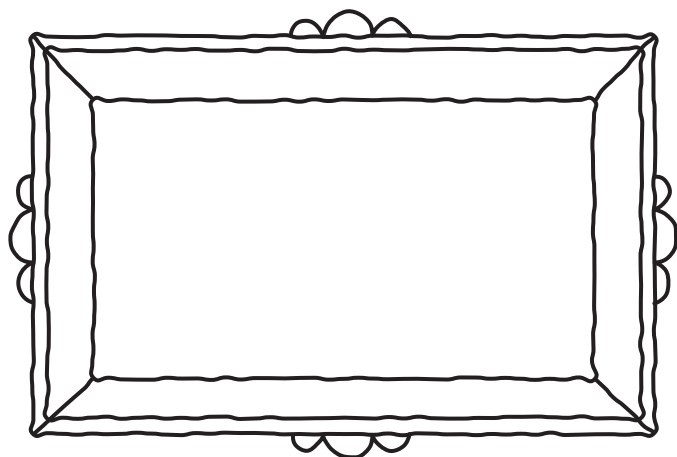

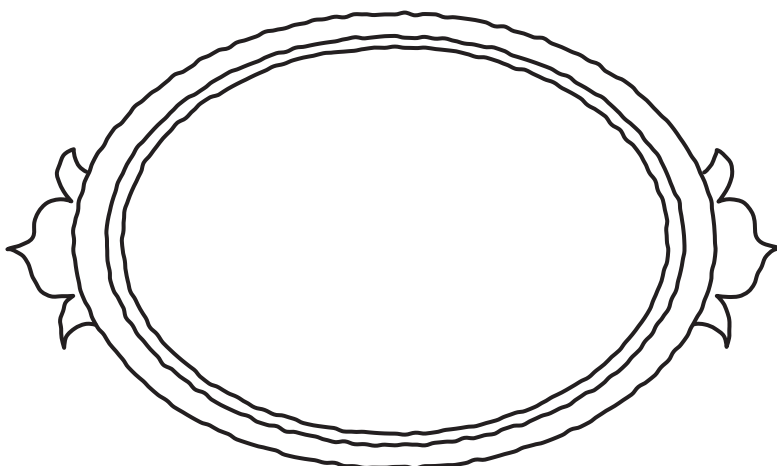

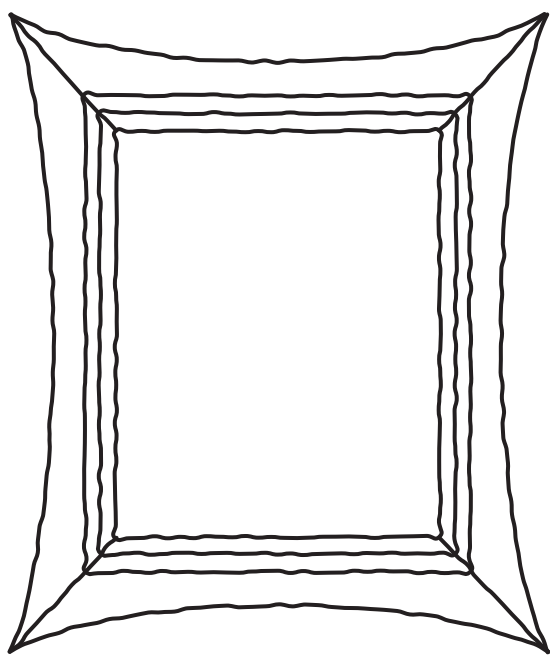

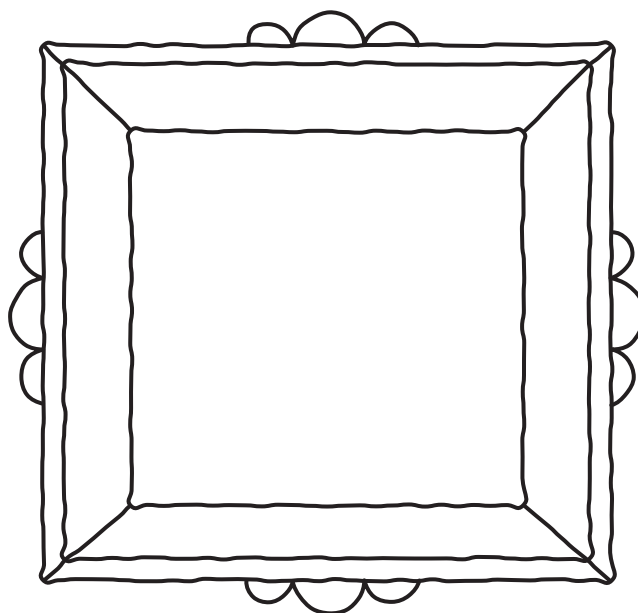

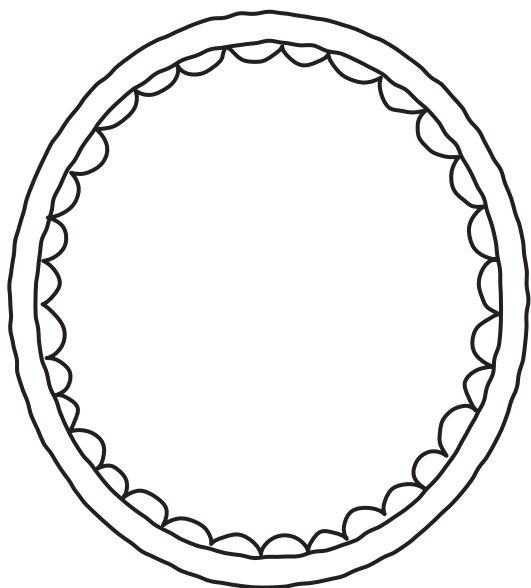

It's time to be a detective! What hidden details can you find in the artworks?

If you were looking at the artwork through a magnifying glass, what would you find...

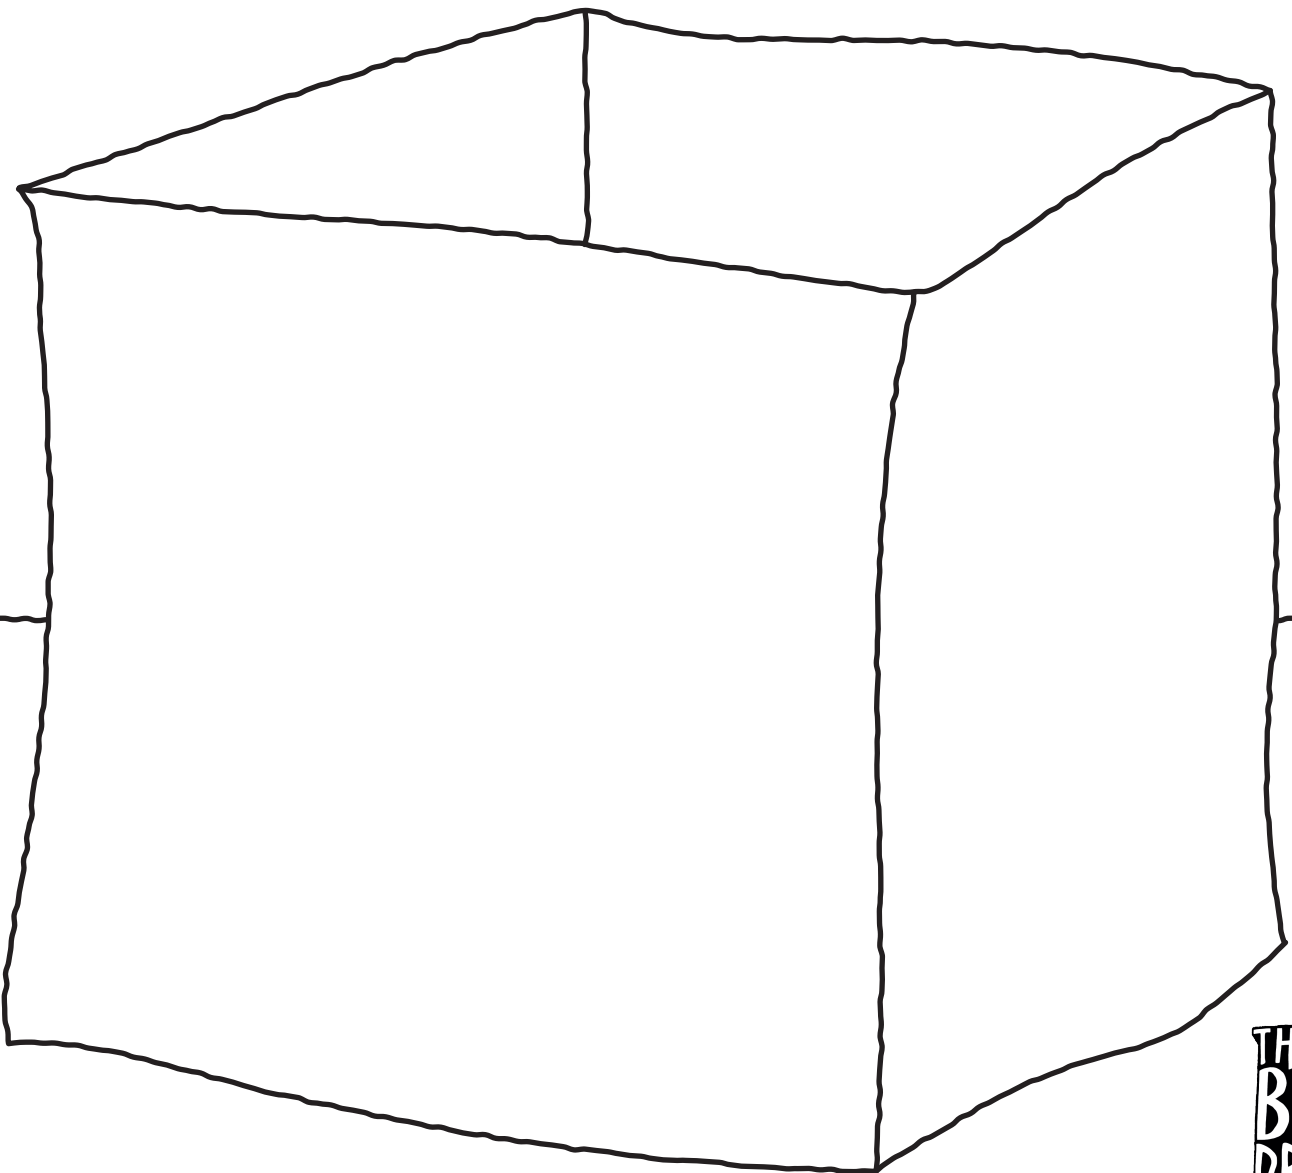

Can you see any brush strokes? Are there objects in the distance that are hard to spot? The longer you look, the more you will see. Remember, you can't get too close to the artworks in the gallery, so you have to be very careful!

Can you find artworks of animals? Which ones are your favourite? Imagine this gallery wall was full of animals...

If you could take one artwork home with you, what would it be? Here's a bag, fill it with your favourite artwork!

We hope you enjoyed this activity! If you'd like to share your masterpieces with us at The Big Draw, make sure to tag us on social media, or send us an email.
